SP 10 CLIPART CLImatic Planning And Reviewing Tools for regions and local authorities

Vittorio Marletto, Arpa Emilia-Romagna, Bologna, I

Clipart partnership

- 1 Arpa
- 2 Saena
- 3 Vaxjo
- 4 Air-Aps
- 5 Jelenia Gora

- 1 Emilia-Romagna
Italia
- 2 Sassonia
Germania
- 3 Småland / Blekinge
Svezia
- 4 Alta Savoia
Francia
- 5 Bassa Slesia
Polonia

Main objectives of the sub-project

- The CLIPART subproject deals with **Mitigation and Adaptation to climate change.**
- Our target are **regional and local authorities.**
- To help them in **planning and reviewing for climate change Mitigation and Adaptation.**
- Clipart subproject discussed and developed a set of **procedures and tools** to do so.

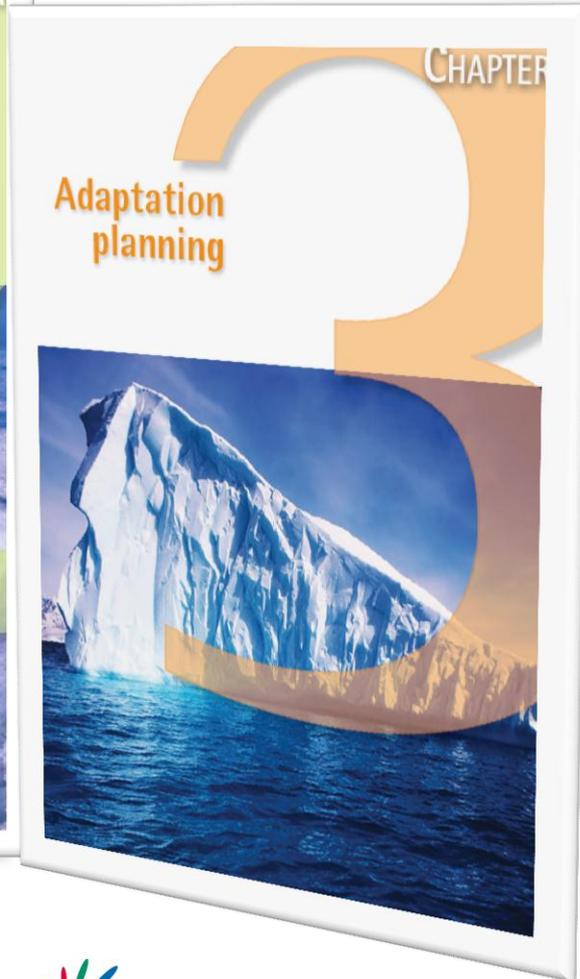

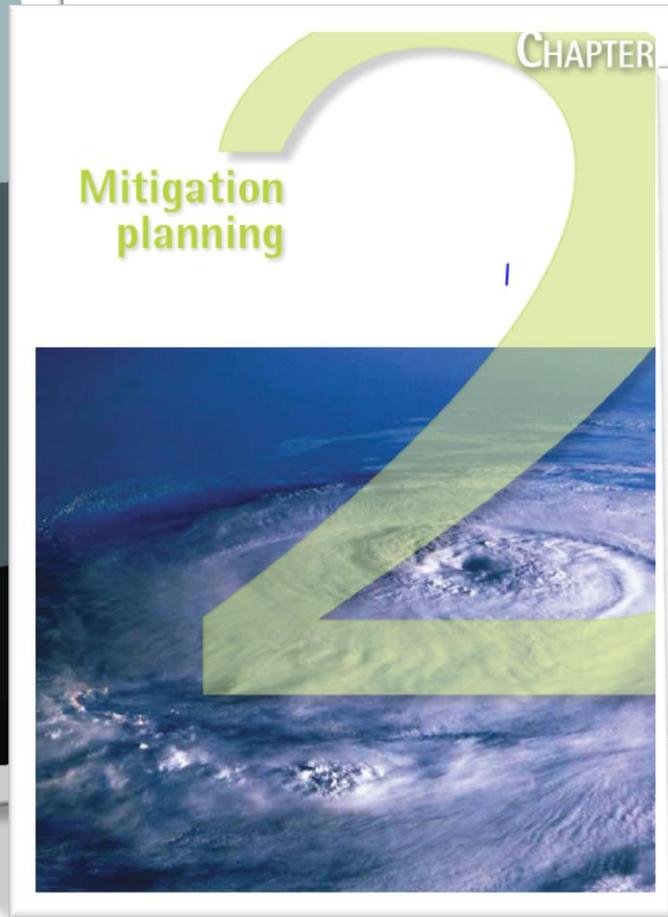

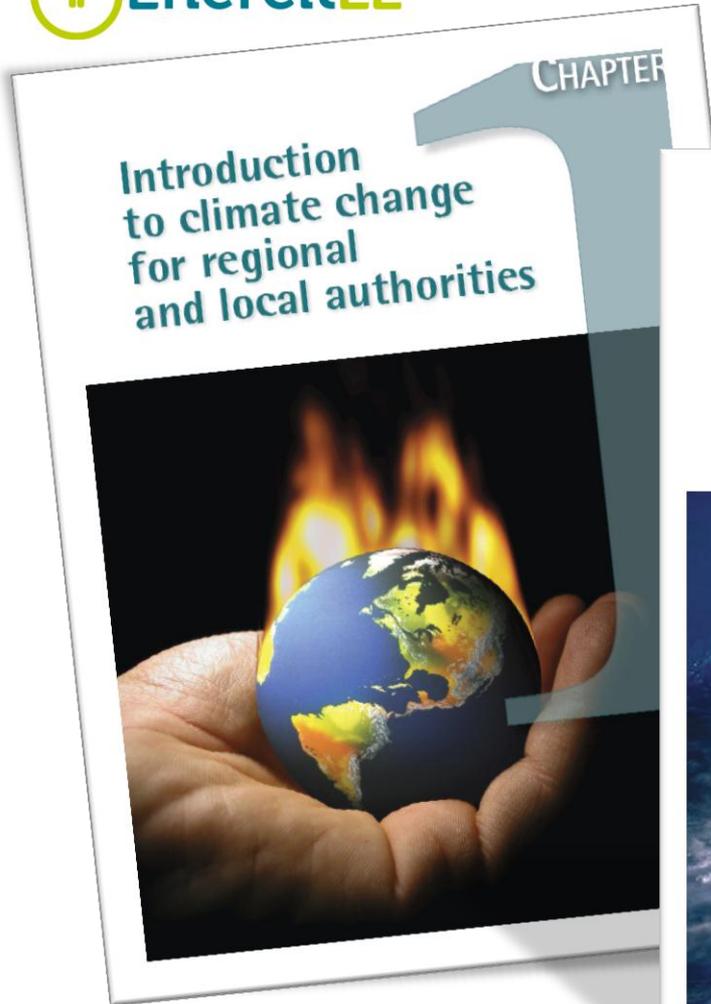

2011

- Clipart started in 2011 and ends in 2012
- Main output from first year was the Initial Clipart Report
- ICR contains a collection of 50+ selected examples of good practices, projects, acts, etc. concerning climate change planning and related activities from the 5 partner regions
- It is downloadable as a pdf from www.energitee.eu/clipart
- It is available as a wiki clipartwiki.wikispaces.com

2012 – the Handbook

- In this last year we are producing the Final Clipart Report, also called the **Clipart Handbook**
- The Handbook is a practical guide for regional and local authorities for **climate change planning**
- It is composed by three main chapters
 - 1 Introduction to climate change,
 - 2 mitigation planning
 - 3 adaptation planning
- It describes **procedures and tools** that have already been implemented and tested in some areas of Europe
- It is based on **partner's experience** in the field of climate science and local planning for mitigation and adaptation

Policies improved in the region

- We are trying to have an impact on the **regional and local climate change policies**
- There are **specific plans at the moment** only on mitigation in Emilia-Romagna
- But there are a number of **initiatives that have to do with climate change adaptation** (e.g. heat wave plan, drought mgmt. board, tropical disease vector monitoring, etc.)
- **An initiative targeted to city mayors** is planned together with AnciER for the end of November, when the Handbook in Italian will be ready and printed

2012 – the Handbook

- The Clipart Handbook contents was defined in the Jelenia Gora Meeting (February 2012)
- The English draft was completed during spring and summer 2012
- At the moment the Handbook is being edited and layouted
- It will be discussed and finalized at the last Clipart meeting in Dresden, 7-8 November
- It will be translated in 4 languages (German, Italian French and Polish) and printed (some copies) and made available also for downloading
- All partners held or will hold local events to disseminate its contents

Deviations from the original plan?

- The partnership changed,
 - the Greek partners withdrew very early in 2011 and were replaced by the City of Vaxjo, (S)
 - in 2012 the local AirAps was replaced by the regional AirRhôneAlpes (F).
- All the consequences were **managed smoothly** with the help of MPCO
- No other problems and deviations worth mentioning

Long term impacts & future prospects

- We are involved as Arpa now in the **Life+ BlueAp** project (just started, three years) led by the city of Bologna, to produce a city adaptation plan to climate change
- Clipart Handbook will be provided as a tool for rational planning
- Our project has been mentioned to the regional ministers (assessors) of Environment and Agriculture for possible use in forthcoming planning activities

Thanks and greetings from Bologna!
