

**EnercitEE
Component Seminar 3 in Leipzig
23 October 2012**

**SP 2 E-FoxES - Energy Saving Foxes
in European Schools**

**Presented by Ute Zieschang,
Bautzen Innovation Centre**

1. Main objectives of the sub-project

- Raise awareness among pupils and the general public in EnercitEE regions
- Establish regional energy saving contests for schools
- Exchange of experiences of participating regions
- Offer the concept to further interested municipalities and regions

2. Main outputs + results

- Common conception for energy saving contests for schools (planned for 01/2013)
- Curriculum for teacher training (draft version available)
- Implementation of energy saving contests in three regions
- Presentation of an European award to the best pupil's project
- Analysis of success factors of energy saving contests (planned for 05/2013)

3. Deviations from the original plan?

- Pilot project in Smaland/Växjö - in the current period
- European award - presented at the beginning of 2013

- Project challenge: to gather schools for participation in the contest and teachers for the workshops
- Contest in Haute Savoie without rivalry character: training and project workshops in schools and final project presentation

4. Policies improved in the regions

- Saxony: Bautzen municipality - interested to improve the contest to reduce energy costs in the schools
- Smaland: broad cooperation in Växjö for a new training concept with tools for teachers
- Haute Savoie: reducing energy in school buildings managed by the General Council
- In all regions: contest used as a tool to improve school lessons

5. Long term impacts & future prospects

- Continuation of the Bautzen contest on “higher level”
- Cooperation with energy supplier in Växjö and information website
- Local sub-project website for schools in Haute Savoie with information and calculation-tool
- Dissemination of the regional concept to other French regions discussed

See you in Leipzig!
