

Energy Agency for Southeast Sweden

Plans for implementation of PraTLA

Regional targets

	Blekinge	Kalmar	Kronoberg
CO2 emissions per pers 2010	3.8 tons	4.4 tons	3.5 tons
CO2 decrease	35 % from 5.9 tons 1995	15 % from 1990	22 % from 1990
RES 2010	50 % RES	50% RES (target reached)	50 % RES
Other relevant targets	The public sector will buy electricity only from RES after 2010. Reduce energy consumption with 10 % 2000-2010.	Reduce CO2 emissions from traffic with 20 % 1995-2010. No net outlet of CO2 by 2030.	6% RES in the transport sector. Reduce the use of electricity with 10 % 1995-2010. Stabilize CO2 from traffic at 1990 level by 2010. No net outlet of CO2 by 2050.

Local targets

Nearly all municipalities in our region will develop their own EE-policy (National program 2010-2014)

Topics – EE, Green procurement, RES, Planning, LCC and EPC

Planning for PraTLA:

- Students will work in 2-4 municipalities for policies
- Students will also work together with ESS and the local energy- and climate advisors in industry and transport projects

- We will execute training for energy- and climate advisors and local authorities
- We will inform about Good practice at local/regional level

Thank you!
